Hi Will

Pl find attached a copy of our revised drawing picking up the widening to 2.5m of the proposed foot/cycleway section on the NW side of Pennine Way nr to the junction with Pennymoor Rd.

I hope that this meets your requirements and that you can confirm that the details are not acceptable.

Hi Gareth,

Please see my attached response to Nick's original email. I would reiterate the consideration of widening as mentioned in my response.

Hope this helps. Please confirm receipt of this email.

Kind regards,

Will

Hi Will,

Many thanks for your email confirming the agreement to the Pennine Way amendments. We hadn't received an agreement email to Nicks email (attached) with the scheme drawing but will take your email today as agreement in principle.

Kind Regards

Gareth Wakenshaw

Subject: Land NE of M42 J10 - Meeting Notes Thursday 22nd February 2024 [Filed 29 Feb 2024 10:56]

Hi All,

Meeting notes from Thursday last week below.

Meeting Held via Teams at 13:30 on Thursday 22 February 2024
Present:

National Highways	Warwickshire CC	Staffordshire CC
Patrick Thoams (PT) Adrian Chada (AC)	Alan Lamb (AL) Tony Burrow (TB)	Will Spence (WS)
N Warwickshire BC	**Hodgetts Estates**	**TetraTech**
Andrew Collinson (AC)	David Hodgetts (DH)	Nick Bunn (NB) Gareth Wakenshaw (GW)

A. Appeal Application PAP/2021/0663

1. Circular 01/2022. Vision Led Travel Plan – NH confirmed acceptance on 25/1/24. **Item closed.**
2. TT 2023 TRANSYT Validation Report. NH provided interim comments on 22/02/24. PT confirmed that the AM and PM base model validation is agreed, and that the stage calls at A5/Core 42 junction are acceptable in the future year models. PT confirmed that the 2011 signal specifications were the most up to date versions. PT noted discrepancies between the queues and delays in the future year models and those reported in the TAA. GW had briefly reviewed the model and TAA queues and delays and advised that the TAA results were a summation of several contributing streams. GW proposed a Teams meeting with NH and AECOM **Action: NH to arrange a meet between AECOM and TT for w/c 26/02/2024.**
3. Departure from Standards**.** NH and TT had a productive Teams meeting on the two Departures on the A5 west of Jn10 on 9 February. NH's initial view was that, subject to reviewing the DAS report, in principal approval would be forthcoming. NH had advised that the Safety Risk assessment would be helpful. TT are preparing a brief Departure from Standard document broadly following Chapter 5 from the Departure Manual Version 2.1.0. **Action TT Prepare DAS report.**
4. Extent of public highway on A5. NB chased Talvinder at NH on 19/02/2024 for a response. **Action: with NH Operations**.
5. WCHAR. TT to update WCHAR once comments received from PT on mitigation designs. See 6a below. **Action: with NH**
6. GG104 briefing note submitted to NH on 01/11/2023. TT are using Nicholson Sloan to do GG104, for completion early March. NB advised that following the meeting in item 3 above, NB had work on the GG104 to commence. PT reminded that this was at risk and may need revisiting if the scheme design changes. PT had delayed commenting on the GG014 brief pending design comments from colleagues. PT noted that the modelling and design comments are expected shortly, at which point GG104 brief comments would also be provided. **Action: NH to issue design comments – due 1 March 2024 so GG104 brief nearly acceptable.**
    a. PT indicated that the NH asset team and improvement team are reviewing the mitigation drawings and were expected to respond w/c 5th February. PT apologises and is chasing the asset team and safety team PT expects to have final comments for issue to TT on 1st March, including for the GG104 PT has active travel comments. One concern raised was that the ped/cycle crossing on the M42 Sbd

off-slip compromises the segregated left turn slip arrangement. NB noted that the segregated left turn slip was a proposal from the Phil Jones' Associates indicative plan and is included in the 2033 No Development arrangement, however there is no need for the slip lane and TT had removed it in their proposed mitigation scheme. The TAA results show little queueing on the M42 Sbd off slip in the with development assessments. DH informed PT that at the October A5 Stakeholder meeting that none of the three M42 Jn10 'low level intervention' options included the left turn slip arrangement but comprised, widening the south overbridge, an A5 hamburger arrangement, and a M42 Ndb to A5 Ebd link. AL confirmed these options and noted that no drawing had be displayed. DH forwarded details of the meeting and NH contact to PT. A query raised on a footway link and one on modelling, which PT has dismissed. **Action: NH to issue design & GG104 brief comments – due 1 March 2024.**

b. TT confirm a new sub-contractor will be used for the S1RSA. NB confirmed that, following the January meeting, TT had not updated the S1RSA brief pending the design comments. **Action: NH to issue design comments – due 1 March 2024**.

7. Longshoot/ Dodwells. AL confirmed that because NH accept that the development traffic impact is negligible and that no impact assessment is required, WCC do not require an assessment at Longshoot/ Dodwells WS does not see any problem in accepting the impact is negligible given the Vectos Paramics model did not assume a height restriction, but needs to confirm with ME. **Action: WS and ME to confirm SCC position at Longshoots/ Dodwells**.
8. S106/ Stagecoach. NB confirmed that Stagecoach emailed on 6th Feb 2024 that they are still happy to divert the 766/767 into the M42 site. TB requested a copy of the email. **Action: NB to forward the email to the attendees. Post meeting Note – email attached. Item closed.**
9. Transport Assessment Addendum (TAA) (submitted to NWBC 7/12/23). SCC approved TAA (22/01/24). WCC confirm they will take NH lead. Comments from NH awaited after TT meet with AECOM. **Action: NH to issue comments on TAA modelling**.
10. Appeal. Appeal opens 18th June. Exchange of Proof is 21 May 2024. All Noted.
11. Meetings. March Meeting set to 1:30pm on Thursday 21st March. **Post Meet Action: AC circulated meeting invite.**
12. AOB. AC requested draft highway conditions from Hodgetts Estates. **Action: TT and Hodgetts Estates to provide draft highway conditions.**

Modelling Progress Table PAP/2021/0663

Correct as at 11:00 on 26/02/24	**Highway Authority**

Attachments: L W Dordon Rd Design Feedback_V1 Issue.docx; Combined Feb 2024 Drawing Pack_MDM Comments.pdf; B033920-TTE-00-ZZ-SK-H-1001 Overall LayoutA.pdf; B033920-TTE-00-ZZ-SK-H-1002 Local Plan.pdf; B033920-TTE-00-ZZ-SK-H-1003 Local Plan with Additional Lane.pdf

Nick,

We have completed a review of the revised proposed improvements, which include the site access drawings.

Please see attached word document detailing our feedback on the site access drawings. In addition to design feedback in relation to the additional local plan design drawings.

In summary, our comments on the local plan design drawings conclude that the improvement scheme is acceptable in principle. Notwithstanding, our comments include recommended changes that we consider could improve the scheme, but these can be dealt at the next stage of the design process.

In relation to our review of the updated TRANSYT models, we are content that they now mitigate the impact of the development from a modelling perspective. As part of this, we have reviewed the Technical Note that has been submitted along with the Local Plan model.

We understand that the M42 J10 scheme been modelled both separately and in conjunction with Local Plan improvements at the M42 J10:

- As such, the following model was submitted in March 2024 to replicate the proposed highway layout if the Local Plan improvements were not implemented:
  - 2. M42 Jn10 and A5 – Exist With Ref Case Pen Way & Dordon v7 Site Access & Mitig With Development.t16

- The following updated model has then been submitted in April 2024 to replicate the proposed highway layout if the Local Plan improvements were implemented:
  - 5a. M42 Jn10 and A5 – Local Plan Model v7 with Site Access & Addl Mitigation With Dev.t16

Asset Lead feedback

I have approached National Highways Asset Leads who have also undertaken a review of the proposals on the various asset types, the summary of their feedback is provided below:

Vehicle Restraint System

No VRS details appear to be on the drawings provided. A Road Restraint Risk Assessment Process (RRRAP) should be carried out for the extent of the Works and VRS drawings provided based on the RRRAP output.

Earthworks/Retaining structures

As indicated on the sections, some new embankment shoulders, abutting the existing A5 embankment, have been proposed to create space for the cycleway and additional lane. A review of the cross section drawings indicate the proposed side slope gradient is 1v in 3h, which is sensible from a geotech perspective. Since the proposal involves modification of the SRN and geotechnical assets, the applicant should provide a geotechnical report in accordance with design standard CD622, outlining their intentions and confirming that they will not impose any geotechnical risk to SRN assets. It is worth noting that there appears to be a number of minor structures (signs, lighting columns). Considerations will be required for the foundation design and the interaction with the embankment shoulders.

Other considerations:

- With regard to the proposed cycle route, it would be useful to understand if there is an intention to extend the signalisation of the crossing points to include M42 J10 to provide a continuous safe route. This looks to be the case having looked at the additional drawing – But needs confirmation.
- The plans indicate that both laybys on the East and Westbound A5 will be removed. There is currently limited provision for rest breaks along the A5. It would be useful to understand the proposal for alternative provision for drivers.
- With only one entrance and exit directly onto the A5, future maintenance of the A5 will involve closing access to the business park.
- Concerns over additional signalisation possibly causing queueing onto M42 J10 and the slip roads. In addition, what are the queues like from the M42 J10 in to the area of this junction. We don't want right turners out of the development blocking the eastbound movement at peak times.
- Is there a proposal to improve the footway to the westbound carriageway? Is the proposal for the new foot/cycleway to be privately maintained? If so, we will have two facilities parallel to each other?
- The potential link of the footway to Birch Coppice should be a definite link, and the footway should also tie into Core 42. As both these traffic signals have crossing facilities for both pedestrians and cyclists.

Kind Regards
Patrick

NB: The below comments for sections 1 through to 5 should be read in conjunction with Document Ref: Combined Feb 2024 Drawing Pack_MDM Comments.

Drawing No: B033920-TTE-00-ZZ-PL-H-0002_P03	1 Junction Comments: 1.1 Guard rail should be detailed where appropriate, such as on any pedestrian refuges. 1.2 Line type 1004 should continue to the stop line at this location. We assume that the design speed for the approach road to the proposed development is 40 mph or less. 1.3 It appears that on the mainline carriageway, which is a reduced speed limit of 50 mph, the line type should be 1004.1 but this scales to 1004. Can you please therefore ensure that stop lines 1001 are 300mm width and the arrows are 6m length as prescribed by TSRGD. 1.4 This location could include a continuation of line types 1005.1 with 1010 on the offside as lane markings for eastbound traffic through the junction. 1.5 This is where Linetype 1004.1 should start for the off-side lane approaching M42 Junction 10. 1.6 Linetype 1004.1 should not be crossing the junction on the off-side of the eastbound carriageway, this should be line type 1010. Given the number of potential errors picked up with regard to road markings, it is recommended that the road marking layout is thoroughly reviewed against the appropriate design standards. 1.7 The lane width provision should be checked and amended as necessary to ensure that the design vehicle, most likely the 16.5m long Articulated HGV in this case, can be accommodated as per paras. 7.13 to 7.14.1 of CD123. 2 Main Line Carriageway Comments:As per comment 1.3 above. 2.2 The markings in this location should be Linetype 1010, not 1005.1. See also comment 1.6 above. 2.3 This existing pedestrian crossing modifications at this location should be reconsidered as it is bad practice to have them where hatching is present as this can give rise to potential for pedestrians to wait in the hatched area, which is a safety concern. Tactile paving has also not been shown. 2.4 At this location and going westwards, the proposed safety margin provision and footway behind gets close to the existing boundary fence / hedge and requires the removal of a safety barrier. No details are shown as to how the removal of this barrier will be justified, i.e. have the hazards associated with its original need been eliminated. 2.5 It is assumed that the bus shelter provision shown here is to be on an island between a footpath at the front and another to the rear. This is quite a space hungry detail and could be simplified if so. Consideration should also be given as to whether a connection will be required to the proposed footway cycleway at the toe of the embankment behind.

	2.6 The earthworks line over the gravel driveway at this location suggests levels are not compatible. Any affected existing accesses to be retained should be shown and accommodated by the design. 3 <u>Visibility Splay Comments:</u> 3.1 The intervisibility splay shown has been checked and appears to be satisfactory. Any other relevant visibility splays as detailed in CD 123 Section 7 should be shown, such as signal head visibility etc.
Drawing No: B033920-TTE-00-ZZ-PL-H-0003_P03:	4 <u>Shared Cycle Track and Pedestrian Track Comments:</u> 4.1 The provision of a shared cycle track and pedestrian route outside of the proposed earthworks appears to double up on the footpath provision along the north side of the A5 carriageway. Users of this facility may not feel secure given the isolated nature, even if lit. Consideration should be given to widening the proposed footpath alongside the carriageway where security could be considered better given the street lighting and passing traffic, but weighed up against any safety issues in relation to the proximity of the traffic.
Drawing No: B033920-TTE-00-ZZ-PL-H-0004_P03:	5 <u>Shared Cycle Track and Pedestrian Track Comments:</u> 5.1 As per comment 4.1 above. 5.2 As a generally rural facility in nature a shared footway / cycle facility should be adequate. If the nature is likely to change in the future due to development, or traffic expected to noticeably increase, then a slightly wider segregated facility should be given consideration. 5.3 Consideration should be given to providing connections from the shared facility to the A5 at crossing locations, junctions and any key facilities. 5.4 Appropriate signage should be detailed at hazardous locations, such as farm access track crossings.
Drawing No: B033920-TTE-00-ZZ-PL-H-0005_P03:	No further comments, only similar to section 5 above.
Drawing No: B033920-TTE-00-ZZ-PL-H-0021_P03:	<u>Alignment -New Access-CL – Approximately ch20 onwards:</u> Crossfalls appear to be sub-standard - should be checked against CD109 superelevation requirements for the road design speed.
Drawing No: B033920-TTE-00-ZZ-PL-H-0021_P03 to 0026_P01:	<u>Alignment – A5 Eastbound Offside – whole length:</u> Crossfalls appear to be sub-standard - should be checked against CD109 superelevation requirements for the road design speed.
Drawing No: B033920-TTE-00-ZZ-PL-H-0031_P01 to 0034_P01:	Horizontal geometry shown does not have transitions, these are a mandatory CD109 requirement.
<u>NB:</u> The below comments for sections 1 through to 3 should be read in conjunction with Drawing Ref: 784-B033920-TTE-00-ZZ-SK-H-0001-P05_MDM Comments.	
Drawing No: 784-B033920-TTE-00-ZZ-SK-H-0001-P05	1 <u>A5 Western Approach to M42 Junction 10:</u> 1.1 The nose length scales at 43m which accords with the requirements for an urban road with a speed limit of 50 mph or less, as per CD 122 Table 3.21. However, the carriageways feature hard strips which are usually features for on a rural dual carriageway all-purpose road. Road classification should be determined and appropriate standard used to ensure consistency. Nose length for a rural road is 75m, which will reduce

	weaving length available. It should be noted that the existing layout has a very short nose arrangement. The nose ratio should also be checked for minimum requirements. 1.2 The line type for the slip road to Kinsall Green should be Linetype 1010. The existing slip lane appears to be of a non-standard layout and the proposals mimic it to some extent. The slip lane should be checked for hard strip requirements. 1.3 At the crossing on Kinsall Green an advance warning sign (possibly TSRGD 544.1) to forewarn drivers of the potential presence of pedestrians in the road ahead is recommended. 1.4 This existing slip lane appears to be of a non-standard layout and the proposals mimic to some extent. The proposed layout should be detailed to current standards, with a tapering nose. 2 <u>M42 Junction 10 Roundabout:</u> 2.1 The base mapping appears to be out of date here. The proposals appear to match the existing layout according to aerial mapping. 2.2 Consideration should be given to extending the yellow box to cover ore of the merge area subject to performance from a traffic capacity perspective. 2.3 The guidance markings for the merge from the A5 westbound should be smoother with tangential curving geometry. 2.4 Lane width should be checked in this area against minimum requirements and for vehicles to pass a stationary vehicle at this location. 2.5 Width of footway width continuing northwards after crossing should be checked or existing retained from this point. Kerb line should tie in on a curving tangential alignment. The footway / cycleway along the A5 western approach up to this point appears to be 2m throughout. Consideration should be given to improving this width wherever space allows. <u>General:</u> All crossings should be aligned to be perpendicular where possible and have the appropriate depth of tactile paving for a straight approach (1.2m) (including Pennine Way).
Departure from Standards Report	3 <u>General Comments:</u> 3.1 The proposals show a three lane configuration (D3AP) on the western approach to M42 J10 in line with CD 127 Figure 2.1.1N1e for a rural all-purpose road (main line) but with lanes reduced to 3.1m width in places as a departure. 3.2 The proposals also include a reduction in the speed limit between the Pennine Way interchange and M42 J10 to 50 mph, which gives the potential for the 320m approach to the stop line being to CD 127 Figure 2.1.1N1g requirements for an urban all-purpose road as an extension of typical roundabout approach details, which allow for lane reductions on approach below CD127 requirements. 3.3 It should be noted that CS127 table 2.24 des allow for a reduction in set-back of safety barriers from 1200mm to 600mm on 50mph speed limit roads as a relaxation. This could potentially be used be used with either cross section to improve lane widths to a minimum of 3.3m or give a greater clearance to the footpath / cycleway.
Drawing No: B033920-TTE-00-ZZ-DR-H-1001	No further comments, however the comments already raised in relation to Drawing No: 784-B033920-TTE-00-ZZ-SK-H-0001-P05 still apply on this drawing.
Drawing No: B033920-TTE-00-ZZ-DR-H-1002	The alignment of the bridge looks acceptable in principle. However the arrows need to correspond to the destinations of A5W with Green Lane, M42N and A5E on the off-side. Putting a left turn arrow on approach to an off-slip may cause confusion to motorists and lead to safety issues.

NB: The below comments for sections 4 to 5 should be read in conjunction with Drawing Ref: 784-B033920-TTE-00-ZZ-DR-H-1003 Local Plan with Additional Lane_MDM Comments.			
Drawing No: B033920-TTE-00-ZZ-DR-H-1003	4 Proposed Three Lane Option for A5 Eastbound Exit: 4.1 There is a safety implication – there will be three lanes of traffic on the corresponding circulatory approaching this exit for A5 Eastbound traffic, meaning that there is a potential for side swipe collisions, as well as overloading the second lane from the off-side carriageway which takes traffic for M42S and Kingsbury too. 4.2 The roundabout lane markings need to be configured to suit this proposal with said lane marked for A5E traffic. 4.3 In relation to the side swipe collision potential, a swept path analysis will be required that shows articulated vehicles can safely make all possible manoeuvres from all lanes on approach, circulatory and exit carriageways. 4.4 Guidance markings should be shown for all the approaches merging into the circulatory carriageway to ensure lane provision is adequate. It is highly likely that the section of circulatory carriageway immediately before the 3 lane exit to the A5E will need to be marked as 5 lanes to accommodate the two A5 westbound lanes from the M42 southbound off slip. It appears that the existing markings are already flawed in relation to Kingsbury being marked in the wrong lane on the norther bridge over the M42. 5 Trinity Road (South East Arm): 5.1 The newly aligned kerb from the direction of Kingsbury needs to be tied in properly to the existing kerb with curving tangential geometry.

OFFICIAL

Hi Gareth

Thanks for confirming.

Regarding point 2, WCC have reviewed the models and have run the models, however I would prefer to review the submitted outputs prior to confirming our position on impact.

I also note that NH position statement on Friday suggested that work is still continuing with regards to the Transyt and design matters. WCC are not able to set out our position until the final suite of design and modelling information has been shared.

Kind Regards

Alan

Subject: Land NE of M42 J10 Highways - WCC Review of TRANSYT Model

OFFICIAL

Hi Alan,

Thanks for the phone call earlier. Just to summarise and for transparency for everyone else;

- Your consultants, SLR, have run the TRANSYT files I sent to Moises on 19th April. I confirmed those model files are the latest versions, based on the current designs.
- You and Moises have reviewed the results and consider the impact on Warwickshire's network to be minor/ negligible and feel that you are close to agreeing the results.
- For completeness you would like the TRANSYT Output files (pdf) to compare against the printouts that SLR have run. I will get onto this for you.
- Moises is away on annual leave for a couple of weeks.

Do let me know if the above is accurate.

Kind Regards

Hi Alan

Pl see below from Patrick which agrees the Transyt modelling, that the impact on the highway network is acceptable, that the proposed highway design are acceptable in principle, and that the design comments (in the attachments) can be addressed at subsequent design stages.

I trust that you are now able to confirm that on the roads for which WCC are the highway authority:
1. the appeal proposals with the proposed mitigation measures have a cumulative residual impact which is not severe in the Reference Case and in the Local Plan Case. For ease of reference, I have attached the agreed Transyt results tables taken from our Transyt notes of 8 March and 10 April.
2. the appeal proposals do not result in an unacceptable impact on road safety in either in the Reference Case and in the Local Plan Case.
3. the appeal proposals are in accord with policies LP23, LP27 and LP29(6) of the North Warwickshire Local Plan 2021 and paragraph 115 of the National Planning Policy Framework 2023.
4. WCC do not intend to undertake their own separate modelling assessment.

I look forward to hearing from you.

Subject: RE: M42 Jn10 A5/ Site access drawings [Filed 02 May 2024 16:20]

Nick,

We have completed a review of the revised proposed improvements, which include the site access drawings.

Please see attached word document detailing our feedback on the site access drawings. In addition to design feedback in relation to the additional local plan design drawings.

In summary, our comments on the local plan design drawings conclude that the improvement scheme is acceptable in principle. Notwithstanding, our comments include recommended changes that we consider could improve the scheme, but these can be dealt at the next stage of the design process.

In relation to our review of the updated TRANSYT models, we are content that they now mitigate the impact of the development from a modelling perspective. As part of this, we have reviewed the Technical Note that has been submitted along with the Local Plan model.

We understand that the M42 J10 scheme been modelled both separately and in conjunction with Local Plan improvements at the M42 J10:

- As such, the following model was submitted in March 2024 to replicate the proposed highway layout if the Local Plan improvements were not implemented:
  - 2. M42 Jn10 and A5 – Exist With Ref Case Pen Way & Dordon v7 Site Access & Mitig With Development.t16

- The following updated model has then been submitted in April 2024 to replicate the proposed highway layout if the Local Plan improvements were implemented:
  - 5a. M42 Jn10 and A5 – Local Plan Model v7 with Site Access & Addl Mitigation With Dev.t16

Asset Lead feedback

I have approached National Highways Asset Leads who have also undertaken a review of the proposals on the various asset types, the summary of their feedback is provided below:

Vehicle Restraint System

No VRS details appear to be on the drawings provided. A Road Restraint Risk Assessment Process (RRRAP) should be carried out for the extent of the Works and VRS drawings provided based on the RRRAP output.

Earthworks/Retaining structures

As indicated on the sections, some new embankment shoulders, abutting the existing A5 embankment, have been proposed to create space for the cycleway and additional lane. A review of the cross section drawings indicate the proposed side slope gradient is 1v in 3h, which is sensible from a geotech perspective. Since the proposal involves modification of the SRN and geotechnical assets, the applicant should provide a geotechnical report in accordance with design standard CD622, outlining their intentions and confirming that they will not impose any geotechnical risk to SRN assets. It is worth noting that there appears to be a number of minor structures (signs, lighting columns). Considerations will be required for the foundation design and the interaction with the embankment shoulders.

Other considerations:

- With regard to the proposed cycle route, it would be useful to understand if there is an intention to extend the signalisation of the crossing points to include M42 J10 to provide a continuous safe route. This looks to be the case having looked at the additional drawing – But needs confirmation.
- The plans indicate that both laybys on the East and Westbound A5 will be removed. There is currently limited provision for rest breaks along the A5. It would be useful to understand the proposal for alternative provision for drivers.
- With only one entrance and exit directly onto the A5, future maintenance of the A5 will involve closing access to the business park.
- Concerns over additional signalisation possibly causing queueing onto M42 J10 and the slip roads. In addition, what are the queues like from the M42 J10 in to the area of this junction. We don't want right turners out of the development blocking the eastbound movement at peak times.
- Is there a proposal to improve the footway to the westbound carriageway? Is the proposal for the new foot/cycleway to be privately maintained? If so, we will have two facilities parallel to each other?
- The potential link of the footway to Birch Coppice should be a definite link, and the footway should also tie into Core 42. As both these traffic signals have crossing facilities for both pedestrians and cyclists.

Kind Regards
Patrick

Subject: Re: M42 Jn10 A5/ Site access drawings

OFFICIAL - Sensitive

Hi Nick

Thanks for your email. Before responding please can you confirm the following:

1. were any revisions necessary to the schemes following discussions with NH which have resulted in updated Transyt modelling? Revisions to the Transyt models in response to NH (AECOM) comments are as detailed in our Transyt modelling notes of 8 March and 10 April

which you already have copies. Between the 10 April note and Patrick's email of 2 May no further updates to the Transyt models or results were made.

2. are you able to summarise what changes were made to the highway layout? There were no changes to the proposed mitigation measures, the site access junction and the cycleway link to Browns Lane. NH requested larger drawings which showed the mitigation measures, where relevant the local plan elements, and the whole of the M42 Jn20 for context. These drawings:

    - B033920-TTE-00-ZZ-SK-H-1001-P01 shows Reference Case With Development Improvements. That is the whole of M42 Jn10 with the proposed mitigation measures from 784-B033920-TTE-00-ZZ-PL-H-0001-P05 and, on the right hand side of the drawing the flaring of the eastbound A5 to the proposed A5/ Site Access junction from 784-B033920-TTE-00-ZZ-PL-H-0002-P03. This drawing does not show the local plan improvements for M42 Jn10
    - B033920-TTE-00-ZZ-SK-H-1002-P01 shows the Local Plan Case With Development Improvements . That is whole of M42 Jn10 with the PJA retained Local Plan improvements for the southern overbridge (shown in red), the proposed mitigation measures from 784-B033920-TTE-00-ZZ-PL-H-0001-P05 (which amends the PJA proposals for this approach) and, on the right hand side the flaring of the eastbound A5 to the A5/ Site access junction from 784-B033920-TTE-00-ZZ-PL-H-0002-P03. The PJA proposal for a segregated left turn slip lane from M42 southbound off slip has been removed from the proposed scheme.
    - B033920-TTE-00-ZZ-SK-H-1003-P01 shows the Local Plan Case With Development and Additional Mitigation. This is the above drawing (B033920-TTE-00-ZZ-SK-H-1002-P01) plus a 3-lane exit from the M42 Jn10 circulatory to the A5 eastbound exit, and the continuation of three eastbound lanes to the A5/Site Access junction.

    Hope that's clear – happy to meet to discuss/ clarify any issues

3. do the Transyt outputs and models supplied by Gareth on the 30/04 represent the latest outputs or are there new models and outputs which can be shared to review? The models shared on 30 April and the outputs are the latest versions
4. please confirm the pdf of results attached to the email reflect the final set of agreed modelling? Confirmed

Many Thanks

A5 CYCLEWAY IMPROVEMENT

Sheet Title

PROPOSED LAYOUT FOR A5 AND NEW SITE ACCESS

TTE Project Number	Drawn By	Date	Checked By	Date	Approved By	Date	Scale @ A1	Suitability
784-B033920	RN	Feb'24	DM	Feb'24	NB	Feb'24	1:1000	S3

Client Project Number	Originator	Volume/System	Level/Location	Type/Code	Role	Number	Revision
B033920	TTE	00	ZZ	PL	H	0002	P03

TTE_MT_v1

Appendix NRB 8: A5 Site Access Junction Long Section and Cross Sections

Notes - Contour Plan

1. Drawing to be read in conjunction with long sections and cross sections drawings.
2. All earthworks have a maximum 1 in 3 gradient (cut & fill) unless shown otherwise.
3. The 3D design has been produced using Autodesk Civil 3D 2019

Key - Contour Plan

- Major contour
- Minor contour
- CH ## — Cross section location/chainage
- Horizontal alignment - straight
- Horizontal alignment - curve
- Chainage

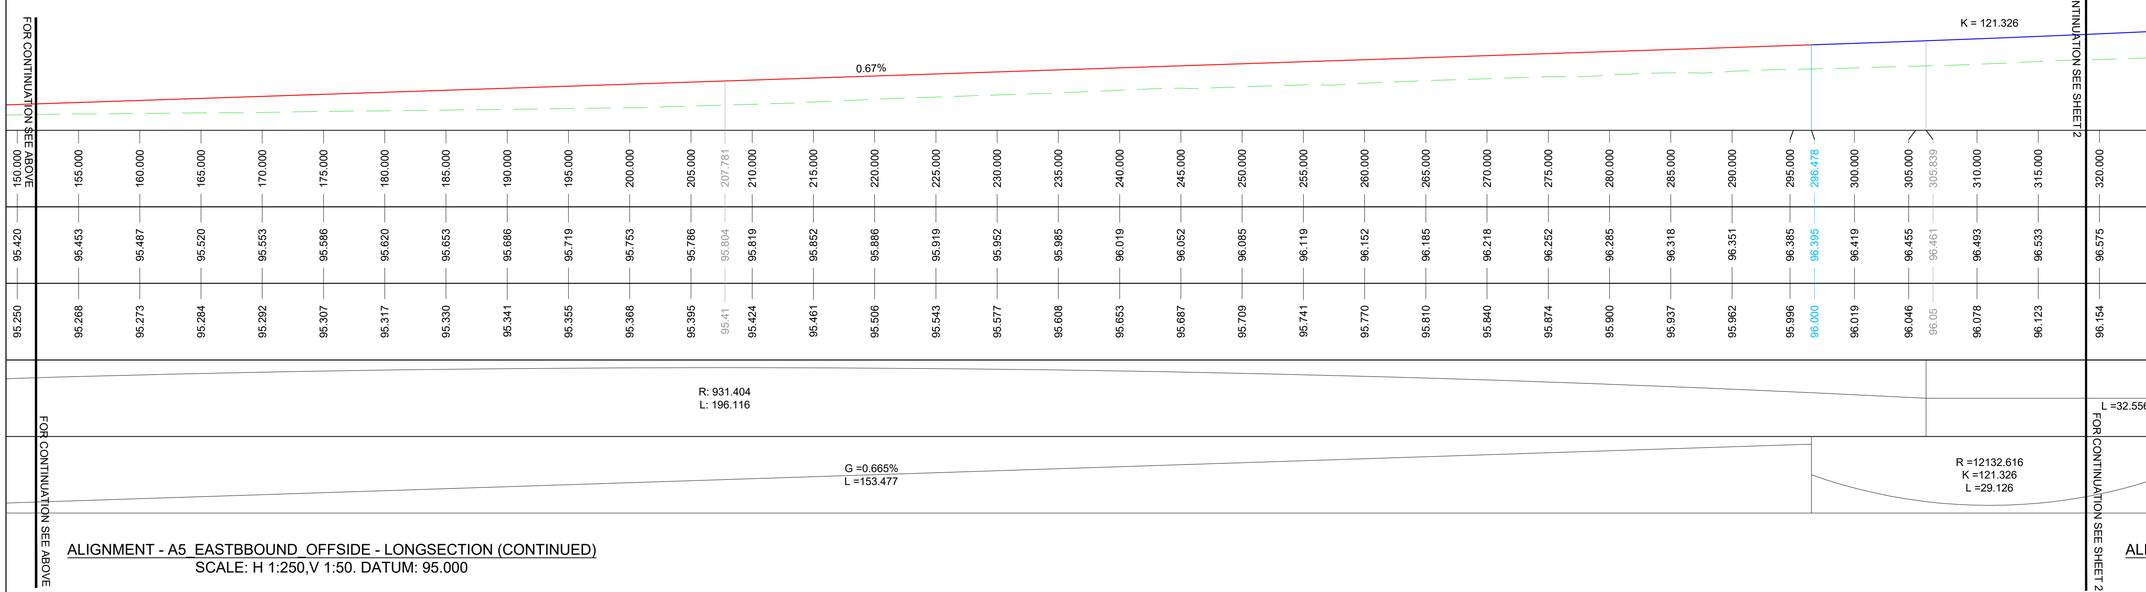
ALIGNMENT - A5_EASTBOUND_OFFSIDE - LONGSECTION
SCALE: H 1:250,V 1:50. DATUM: 95.000



ALIGNMENT - A5_EASTBBOUND_OFFSIDE - LONGSECTION (CONTINUED)
SCALE: H 1:250,V 1:50. DATUM: 95.000

Notes - Long Sections

1. Drawing to be read in conjunction with Contour Plan.
2. The 3D design has been produced using Autodesk Civil 3D 2019

Key - Long Sections

- Existing level
- Proposed vertical geometry - straight
- Proposed vertical geometry - curve (sag/crest)
- Change in vertical profile
- Change in horizontal profile

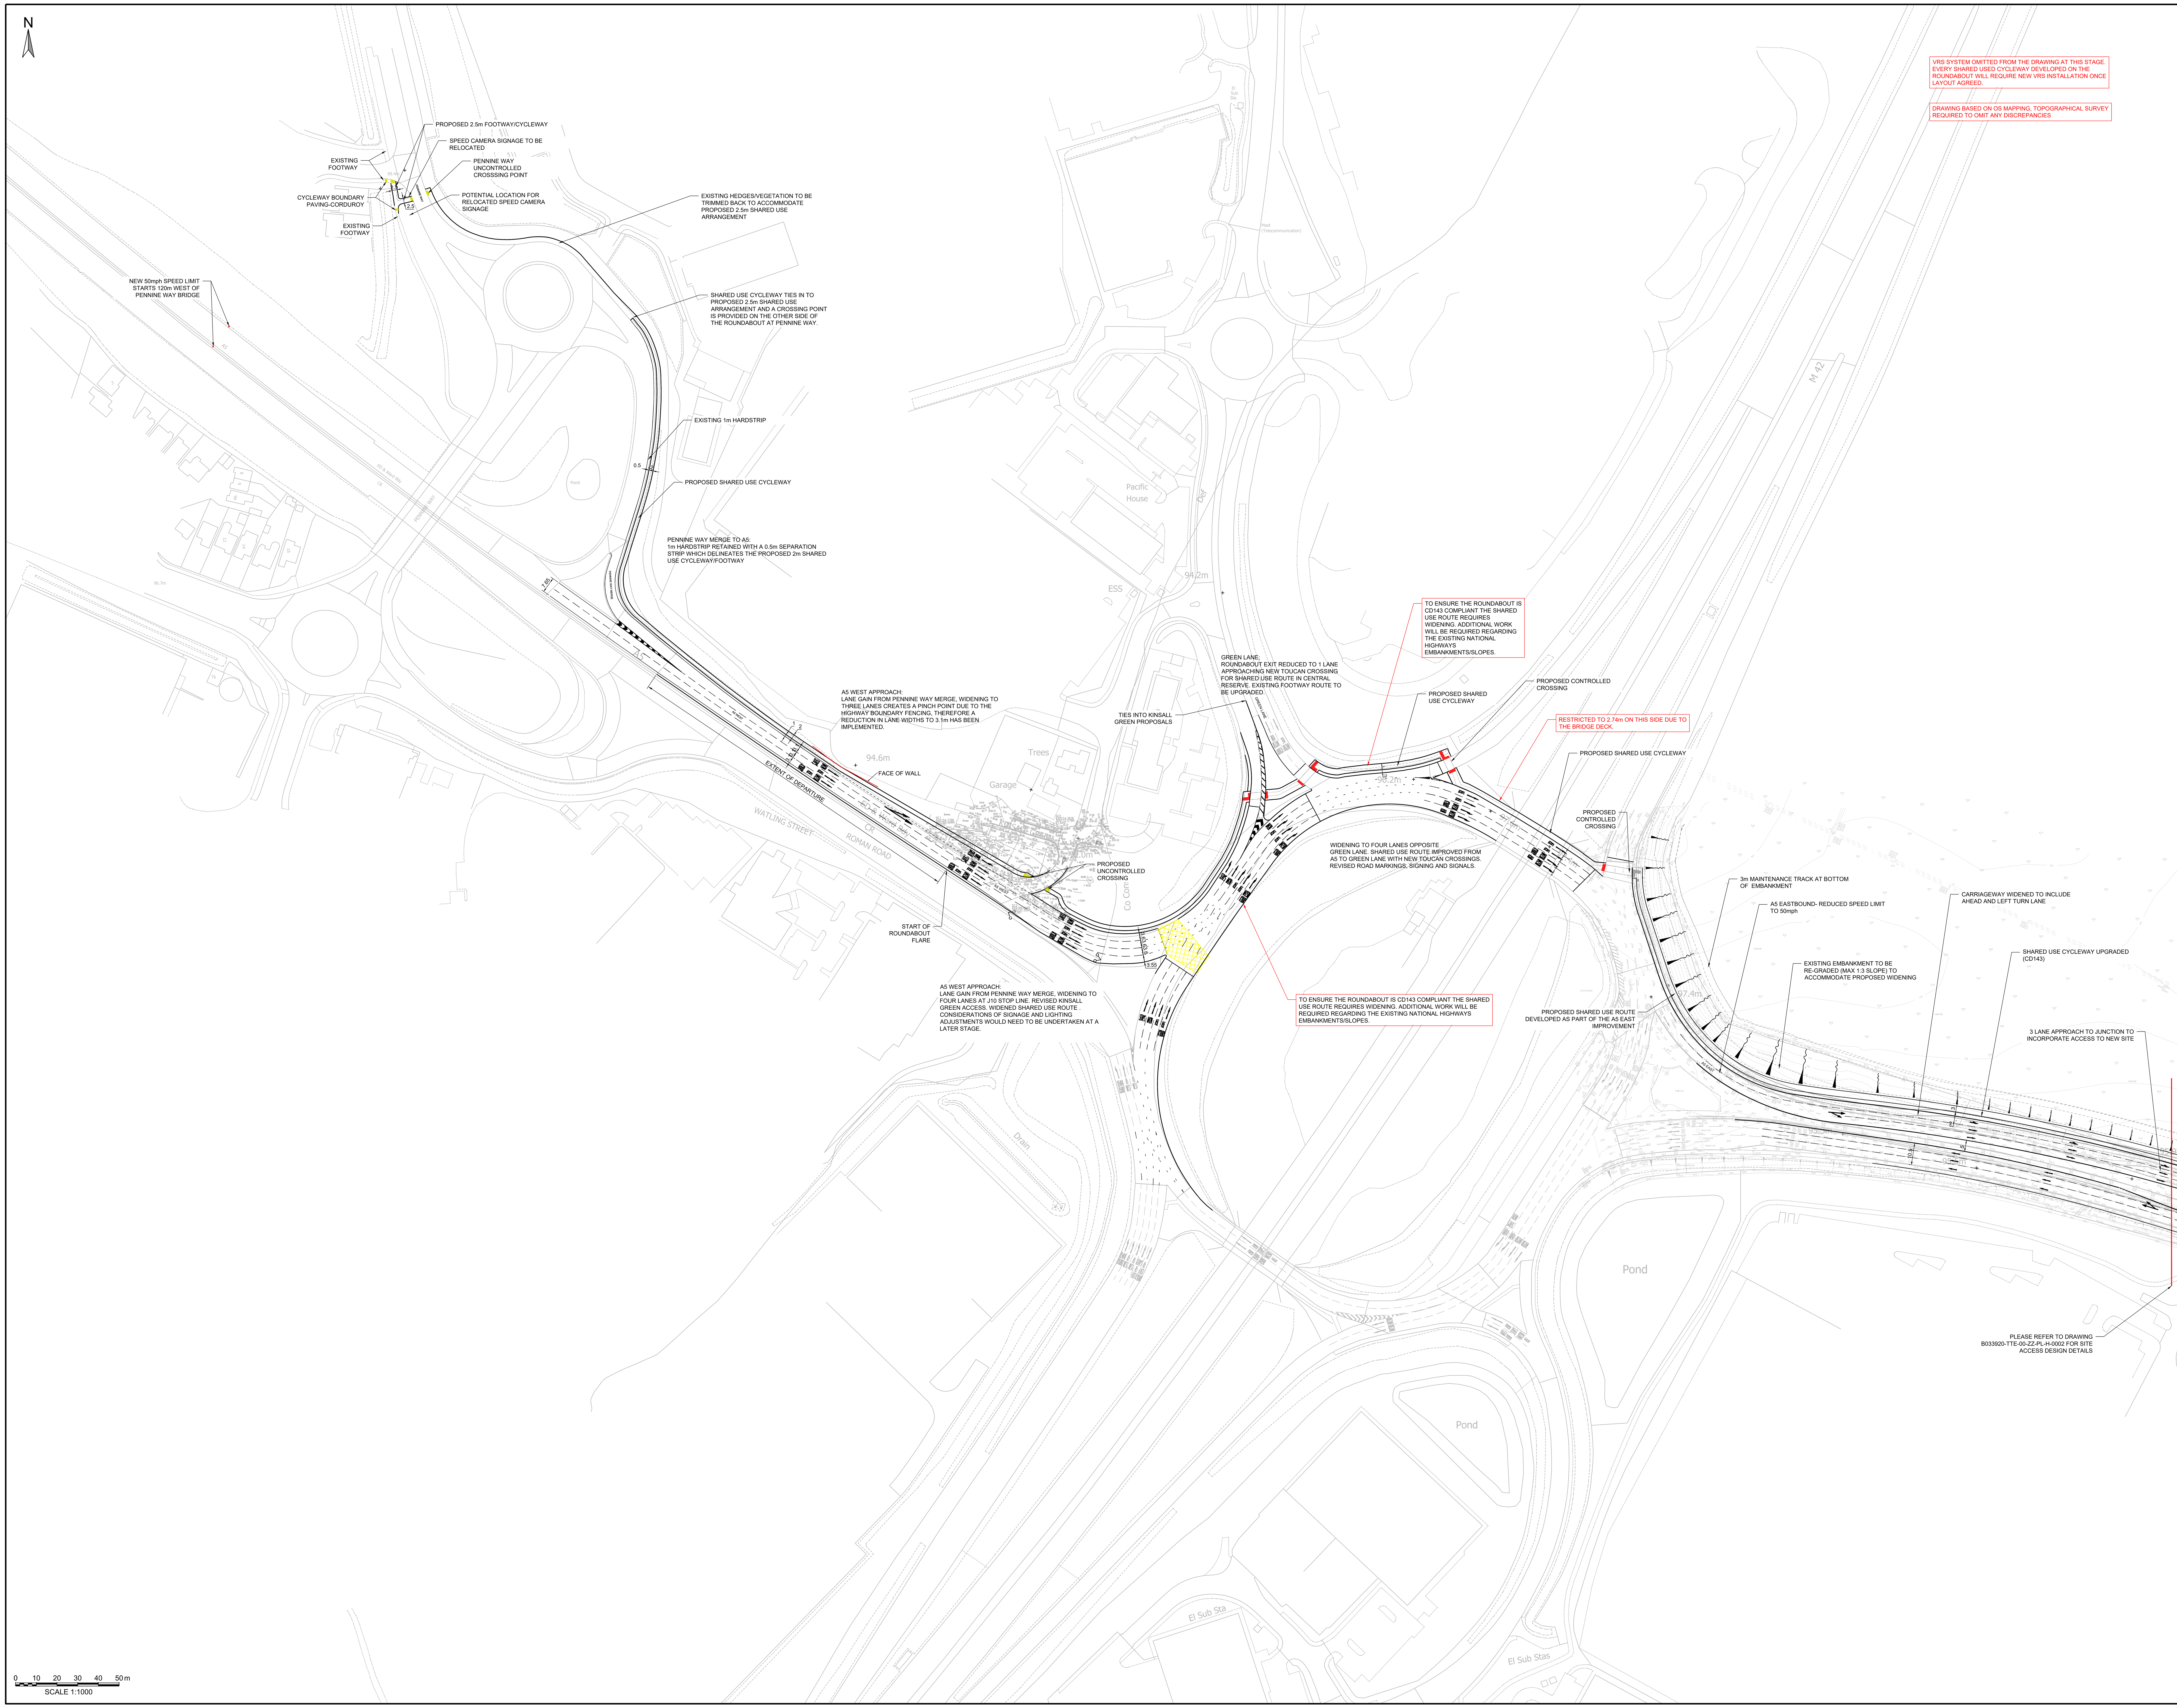
Appendix NRB 11: Reference Case. M42 Jn10 Proposed Improvements: TT Drawing 784-B033920-TTE-00-ZZ-SK-H-1001-P01

NRB 11 - 1



N
PROPOSED 2.5m FOOTWAY/CYCLEWAY
SPEED CAMERA SIGNAGE TO BE RELOCATED
EXISTING FOOTWAY
PENNINE WAY UNCONTROLLED CROSSSING POINT
CYCLEWAY BOUNDARY PAVING-CORDUROY
POTENTIAL LOCATION FOR RELOCATED SPEED CAMERA SIGNAGE
EXISTING FOOTWAY
EXISTING HEDGES/VEGETATION TO BE TRIMMED BACK TO ACCOMMODATE PROPOSED 2.5m SHARED USE ARRANGEMENT
NEW 50mph SPEED LIMIT STARTS 120m WEST OF PENNINE WAY BRIDGE
SHARED USE CYCLEWAY TIES IN TO PROPOSED 2.5m SHARED USE ARRANGEMENT AND A CROSSING POINT IS PROVIDED ON THE OTHER SIDE OF THE ROUNDABOUT AT PENNINE WAY.
EXISTING 1m HARDSTRIP
PROPOSED SHARED USE CYCLEWAY
PENNINE WAY MERGE TO A5: 1m HARDSTRIP RETAINED WITH A 0.5m SEPARATION STRIP WHICH DELINEATES THE PROPOSED 2m SHARED USE CYCLEWAY/FOOTWAY
A5 WEST APPROACH: LANE GAIN FROM PENNINE WAY MERGE, WIDENING TO THREE LANES CREATES A PINCH POINT DUE TO THE HIGHWAY BOUNDARY FENCING. THEREFORE A REDUCTION IN LANE WIDTHS TO 3.1m HAS BEEN IMPLEMENTED.
FACE OF WALL
EXTENT OF DEPARTURE
WATLING STREET
ROMAN ROAD
94.6m
Trees
Garage
PROPOSED UNCONTROLLED CROSSING
START OF ROUNDABOUT FLARE
A5 WEST APPROACH: LANE GAIN FROM PENNINE WAY MERGE, WIDENING TO FOUR LANES AT J10 STOP LINE. REVISED KINSALL GREEN ACCESS. WIDENED SHARED USE ROUTE. CONSIDERATIONS OF SIGNAGE AND LIGHTING ADJUSTMENTS WOULD NEED TO BE UNDERTAKEN AT A LATER STAGE.
Pacific House
ESS
94.2m
TIES INTO KINSALL GREEN PROPOSALS
GREEN LANE: ROUNDABOUT EXIT REDUCED TO 1 LANE APPROACHING NEW TOUCAN CROSSING FOR SHARED USE ROUTE IN CENTRAL RESERVE. EXISTING FOOTWAY ROUTE TO BE UPGRADED.
TO ENSURE THE ROUNDABOUT IS CD143 COMPLIANT THE SHARED USE ROUTE REQUIRES WIDENING. ADDITIONAL WORK WILL BE REQUIRED REGARDING THE EXISTING NATIONAL HIGHWAYS EMBANKMENTS/SLOPES.
PROPOSED SHARED USE CYCLEWAY
PROPOSED CONTROLLED CROSSING
RESTRICTED TO 2.74m ON THIS SIDE DUE TO THE BRIDGE DECK.
PROPOSED SHARED USE CYCLEWAY
PROPOSED CONTROLLED CROSSING
WIDENING TO FOUR LANES OPPOSITE GREEN LANE. SHARED USE ROUTE IMPROVED FROM A5 TO GREEN LANE WITH NEW TOUCAN CROSSINGS. REVISED ROAD MARKINGS, SIGNING AND SIGNALS.
3m MAINTENANCE TRACK AT BOTTOM OF EMBANKMENT
A5 EASTBOUND- REDUCED SPEED LIMIT TO 50mph
CARRIAGEWAY WIDENED TO INCLUDE AHEAD AND LEFT TURN LANE
EXISTING EMBANKMENT TO BE RE-GRADED (MAX 1:3 SLOPE) TO ACCOMMODATE PROPOSED WIDENING
SHARED USE CYCLEWAY UPGRADED (CD143)
TO ENSURE THE ROUNDABOUT IS CD143 COMPLIANT THE SHARED USE ROUTE REQUIRES WIDENING. ADDITIONAL WORK WILL BE REQUIRED REGARDING THE EXISTING NATIONAL HIGHWAYS EMBANKMENTS/SLOPES.
PROPOSED SHARED USE ROUTE DEVELOPED AS PART OF THE A5 EAST IMPROVEMENT
3 LANE APPROACH TO JUNCTION TO INCORPORATE ACCESS TO NEW SITE
M 42
Pond
Pond
El Sub Sta
El Sub Sta
PLEASE REFER TO DRAWING B033920-TTE-00-ZZ-PL-H-0002 FOR SITE ACCESS DESIGN DETAILS
VRS SYSTEM OMITTED FROM THE DRAWING AT THIS STAGE. EVERY SHARED USED CYCLEWAY DEVELOPED ON THE ROUNDABOUT WILL REQUIRE NEW VRS INSTALLATION ONCE LAYOUT AGREED.
DRAWING BASED ON OS MAPPING. TOPOGRAPHICAL SURVEY REQUIRED TO OMIT ANY DISCREPANCIES
0 10 20 30 40 50m
SCALE 1:1000

NOTES

1. THIS DRAWING SHOULD BE READ IN RELATION TO THE SUBJECT OF THE TITLE ONLY. OTHER INFORMATION SHOWN ON THE DRAWING IS TO BE CONSIDERED INDICATIVE ONLY. REFERENCE SHOULD BE MADE TO APPROPRIATE DRAWING SERIES/SPECIFICATIONS FOR OTHER INFORMATION.
2. ALL DIMENSIONS ARE IN METRES UNLESS SPECIFIED OTHERWISE.

KEY	
#	New traffic lanes as a result of the proposed development mitigation works
	Impact of development results in a reduction in queue of over 10pcu and/ or a reduction in delays of over 1 minute.
	Impact of development results in an increase queue of 10pcu or over and/ or an increase in delay of over 1 minute

Appendix NRB 14: M42 J10 Illustrative Local Plan Improvement Scheme: Phil Jones Associates Drawing 02853-01 Rev A

Drawing Status:
These drawings have been produced with reference to the CDM Regulations 2015; Regulation 9.

NRB 14 - 1

These Drawings are for planning approvals and are not to be used for construction purposes. It is the responsibility of the contractor and client to identify risks associated with the construction stage and to design appropriate measures to mitigate. The risks identified on the PJA Scheme Design Risk Assessment are based on the information available at the time of the design (drawing date) Where shown on PJA Design Drawings, the position of services is based on information provided by other parties at the time of the design and is for guidance only. It is the responsibility of the Client and Contractor to verify the exact position of any services before commencing works on site.

Client Duties:
The client is directed to Regulation 4 of the CDM 2015 Regulations: Client duties in relation to managing projects

N

PROPOSED 2.5m FOOTWAY/CYCLEWAY

SPEED CAMERA SIGNAGE TO BE RELOCATED

EXISTING FOOTWAY

PENNINE WAY UNCONTROLLED CROSSSING POINT

CYCLEWAY BOUNDARY PAVING-CORDUROY

POTENTIAL LOCATION FOR RELOCATED SPEED CAMERA SIGNAGE

EXISTING FOOTWAY

EXISTING HEDGES/VEGETATION TO BE TRIMMED BACK TO ACCOMMODATE PROPOSED 2.5m SHARED USE ARRANGEMENT

NEW 50mph SPEED LIMIT STARTS 120m WEST OF PENNINE WAY BRIDGE

SHARED USE CYCLEWAY TIES IN TO PROPOSED 2.5m SHARED USE ARRANGEMENT AND A CROSSING POINT IS PROVIDED ON THE OTHER SIDE OF THE ROUNDABOUT AT PENNINE WAY.

EXISTING 1m HARDSTRIP

PROPOSED SHARED USE CYCLEWAY

PENNINE WAY MERGE TO AS:
1m HARDSTRIP RETAINED WITH A 0.5m SEPARATION STRIP WHICH DELINEATES THE PROPOSED 2m SHARED USE CYCLEWAY/FOOTWAY

AS WEST APPROACH:
LANE GAIN FROM PENNINE WAY MERGE, WIDENING TO THREE LANES CREATES A PINCH POINT DUE TO THE HIGHWAY BOUNDARY FENCING, THEREFORE A REDUCTION IN LANE WIDTHS TO 3.1m HAS BEEN IMPLEMENTED.

PLEASE REFER TO INSERT C FOR FURTHER INFORMATION AT PINCH POINT

FACE OF WALL

EXTENT OF DEPARTURE

PROPOSED UNCONTROLLED CROSSING

START OF ROUNDABOUT FLARE

AS WEST APPROACH:
LANE GAIN FROM PENNINE WAY MERGE, WIDENING TO FOUR LANES AT J10 STOP LINE. REVISED KINSALL GREEN ACCESS. WIDENED SHARED USE ROUTE CONSIDERATIONS OF SIGNAGE AND LIGHTING ADJUSTMENTS WOULD NEED TO BE UNDERTAKEN AT A LATER STAGE.

TO ENSURE THE ROUNDABOUT IS CD143 COMPLIANT THE SHARED USE ROUTE REQUIRES WIDENING. ADDITIONAL WORK WILL BE REQUIRED REGARDING THE EXISTING NATIONAL HIGHWAYS EMBANKMENTS/SLOPES.

AMENDED LAYOUT TAKEN FROM THE PJ ASSOCIATES DRAWING AS PART OF THE NH LOCAL PLAN IMPROVEMENTS

AMENDED LAYOUT TAKEN FROM THE PJ ASSOCIATES DRAWING AS PART OF THE NH LOCAL PLAN IMPROVEMENTS. ADDITIONAL LANE ADDED.

TO ENSURE THE ROUNDABOUT IS CD143 COMPLIANT THE SHARED USE ROUTE REQUIRES WIDENING. ADDITIONAL WORK WILL BE REQUIRED REGARDING THE EXISTING NATIONAL HIGHWAYS EMBANKMENTS/SLOPES.

GREEN LANE:
ROUNDABOUT EXIT REDUCED TO 1 LANE APPROACHING NEW TOUCAN CROSSING FOR SHARED USE ROUTE IN CENTRAL RESERVE. EXISTING FOOTWAY ROUTE TO BE UPGRADED.

TIES INTO KINSALL GREEN PROPOSALS

PROPOSED SHARED USE CYCLEWAY

PROPOSED CONTROLLED CROSSING

RESTRICTED TO 2.74m ON THIS SIDE DUE TO THE BRIDGE DECK.

PROPOSED SHARED USE CYCLEWAY

PROPOSED CONTROLLED CROSSING

WIDENING TO FOUR LANES OPPOSITE GREEN LANE. SHARED USE ROUTE IMPROVED FROM AS TO GREEN LANE WITH NEW TOUCAN CROSSINGS. REVISED ROAD MARKINGS, SIGNING AND SIGNALS.

3m MAINTENANCE TRACK AT BOTTOM OF EMBANKMENT

A5 EASTBOUND- REDUCED SPEED LIMIT TO 50mph

CARRIAGEWAY WIDENED TO INCLUDE AHEAD AND LEFT TURN LANE

EXISTING EMBANKMENT TO BE RE-GRADED (MAX 1:3 SLOPE) TO ACCOMMODATE PROPOSED WIDENING

SHARED USE CYCLEWAY UPGRADED (CD143)

PROPOSED SHARED USE ROUTE DEVELOPED AS PART OF THE A5 EAST IMPROVEMENT

3 LANE APPROACH TO JUNCTION TO INCORPORATE ACCESS TO NEW SITE

PLEASE REFER TO DRAWING B033920-TTE-00-ZZ-PL-H-0002 FOR SITE ACCESS DESIGN DETAILS

VRS SYSTEM OMITTED FROM THE DRAWING AT THIS STAGE. EVERY SHARED USED CYCLEWAY DEVELOPED ON THE ROUNDABOUT WILL REQUIRE NEW VRS INSTALLATION ONCE LAYOUT AGREED.

DRAWING BASED ON OS MAPPING, TOPOGRAPHICAL SURVEY REQUIRED TO OMIT ANY DISCREPANCIES

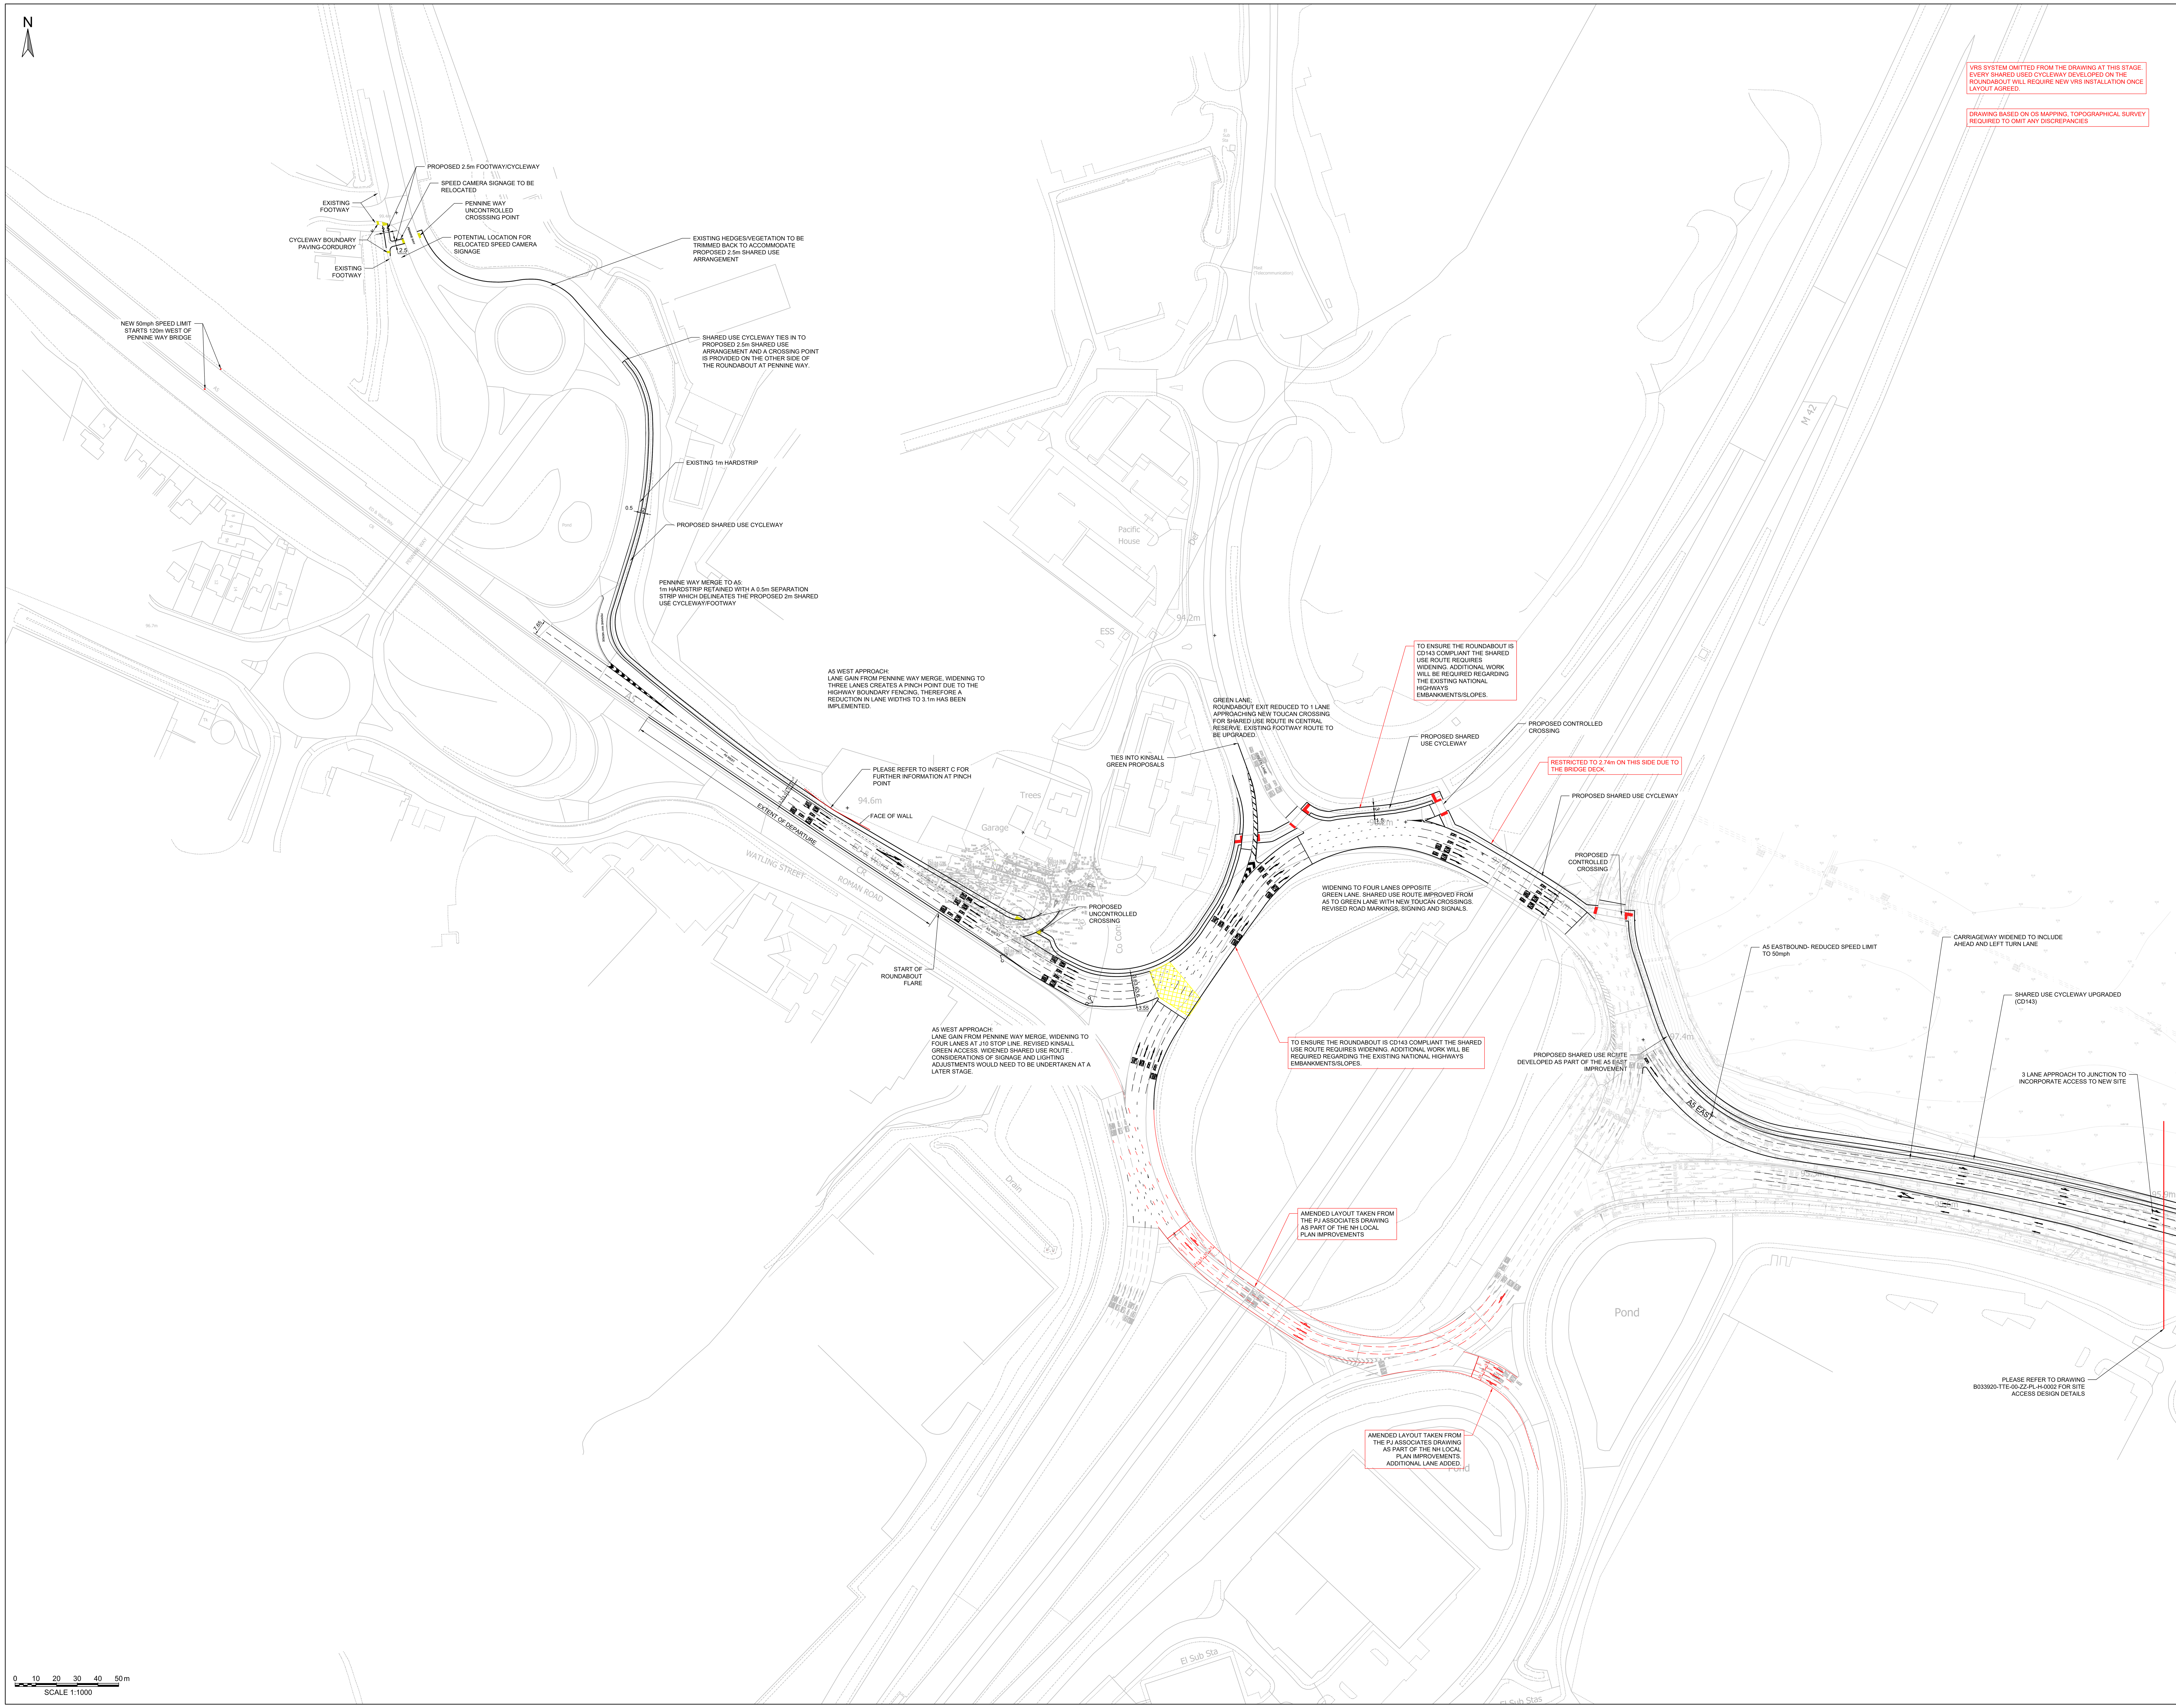
KEY	
#	New traffic lanes as a result of the Local Plan works
#	New traffic lanes as a result of the proposed development mitigation works
	Impact of development results in a reduction in queue of over 10pcu and/ or a reduction in delays of over 1 minute.
	Impact of development results in an increase queue of 10pcu or over and/ or an increase in delay of over 1 minute

Appendix NRB 17: Local Plan Case. M42 Jn10 Proposed Improvements with Local Plan Improvements plus Additional Mitigation: TT Drawing 784-B033920-TTE-00-ZZ-DR-H-1003-P01

NRB 17 - 1



N
PROPOSED 2.5m FOOTWAY/CYCLEWAY
SPEED CAMERA SIGNAGE TO BE RELOCATED
EXISTING FOOTWAY
PENNINE WAY UNCONTROLLED CROSSSING POINT
CYCLEWAY BOUNDARY PAVING-CORDUROY
POTENTIAL LOCATION FOR RELOCATED SPEED CAMERA SIGNAGE
EXISTING FOOTWAY
EXISTING HEDGES/VEGETATION TO BE TRIMMED BACK TO ACCOMMODATE PROPOSED 2.5m SHARED USE ARRANGEMENT
NEW 50mph SPEED LIMIT STARTS 120m WEST OF PENNINE WAY BRIDGE
SHARED USE CYCLEWAY TIES IN TO PROPOSED 2.5m SHARED USE ARRANGEMENT AND A CROSSING POINT IS PROVIDED ON THE OTHER SIDE OF THE ROUNDABOUT AT PENNINE WAY.
EXISTING 1m HARDSTRIP
PROPOSED SHARED USE CYCLEWAY
PENNINE WAY MERGE TO A5: 1m HARDSTRIP RETAINED WITH A 0.5m SEPARATION STRIP WHICH DELINEATES THE PROPOSED 2m SHARED USE CYCLEWAY/FOOTWAY
A5 WEST APPROACH: LANE GAIN FROM PENNINE WAY MERGE, WIDENING TO THREE LANES CREATES A PINCH POINT DUE TO THE HIGHWAY BOUNDARY FENCING. THEREFORE A REDUCTION IN LANE WIDTHS TO 3.1m HAS BEEN IMPLEMENTED.
PLEASE REFER TO INSERT C FOR FURTHER INFORMATION AT PINCH POINT
FACE OF WALL
EXTENT OF DEPARTURE
WATLING STREET
ROMAN ROAD
PROPOSED UNCONTROLLED CROSSING
START OF ROUNDABOUT FLARE
A5 WEST APPROACH: LANE GAIN FROM PENNINE WAY MERGE, WIDENING TO FOUR LANES AT J10 STOP LINE. REVISED KINSALL GREEN ACCESS. WIDENED SHARED USE ROUTE. CONSIDERATIONS OF SIGNAGE AND LIGHTING ADJUSTMENTS WOULD NEED TO BE UNDERTAKEN AT A LATER STAGE.

Written statement to Parliament

Record investment plans for transport network

Over £40 billion will be invested in transformational transport schemes over the next 2 financial years across the country.

From: Department for Transport (/government/organisations/department-for-transport) and The Rt Hon Mark Harper MP (/government/people/mark-harper)

Published 9 March 2023

Delivered on: 9 March 2023

During this Parliament there has been a step change in public investment in infrastructure. The

Autumn Statement protected the public capital budget at record levels, meaning government will invest over £600 billion over the next 5 years. The Chancellor has announced over £40 billion of capital investment in transport across the next 2 financial years, which will drive significant improvements to rail and roads right across our country.

Since agreeing this programme, we have seen headwinds from inflation, triggered by the impact of Putin's illegal war in Ukraine, as well as supply chain disruption as the global economy recovers from the effects of COVID-19.

These headwinds have made it difficult to deliver on our capital programmes, and we recognise that some schemes are going to take longer than expected. Refocusing our efforts will allow us to double down on delivering the rest of our capital programme. This will place our transport investments on a sustainable footing and allow us to support the government's priorities of halving inflation, growing the economy and reducing debt.

In terms of major road investments, Road Investment Strategy (RIS 2) schemes will continue to progress. The A27 Arundel and A5036 Princess Way in Liverpool both face a range of challenges including environmental considerations and ongoing scope and design changes to ensure stakeholders' views are fully considered. As a result, these schemes will be deferred to RIS 3 (covering 2025-2030). Other schemes earmarked for RIS 3 will continue to be developed, in line with the statutory process, but for consideration for inclusion during RIS 4 (beyond 2030). Given many of these schemes were previously expected towards the end of RIS 3, this extra time will help ensure better planned and efficient schemes can be deployed more effectively.

To date we have spent over £800 million on planning the Lower Thames Crossing. It is one of the largest planning applications ever, and it is important we get this right. We remain committed to the Lower Thames Crossing, and the development consent order process will be an important opportunity to consult further to ensure there is an

effective and deliverable plan. In order to allow time for this process, and given wider pressures on RIS, we will look to rephase construction by 2 years.

In rail, HS2 is making good progress, and we have already spent over £20 billion delivering Phase One between London and the West Midlands, supporting 2,500 businesses and creating over 29,000 jobs. The government is prioritising HS2's initial services between Old Oak Common in London and Birmingham Curzon Street to provide delivery of passenger benefits as soon as possible. We remain committed to delivering HS2 services to Euston, and will address affordability pressures to ensure the overall spending profile is manageable. We will therefore take the time to ensure we have an affordable and deliverable station design, delivering Euston alongside high-speed infrastructure to Manchester. We continue to take the High Speed Rail (Crewe – Manchester) Bill through Parliament, and the Crewe-to-Manchester section will also form the foundations for improved rail services in the North through Northern Powerhouse Rail.

The government is committed to delivering HS2 Phase 2a between Birmingham and Crewe. Wehave seen significant inflationary pressure and increased project costs, and so we will rephase construction by 2 years, with an aim to deliver high-speed services to Crewe and the North West as soon as possible after accounting for the delay in construction. Work continues on progressing commitments made in the Integrated Rail Plan to develop HS2 East, the proposed route for HS2 services between the West and East Midlands, and to consider the most effective way to take HS2 trains to Leeds. HS2 continues to represent a very significant investment into our national infrastructure, levelling up communities right across our country, providing a net-zero alternative to car travel and domestic flights, and training a skilled workforce for the UK's future construction industry.

We remain committed to supporting all forms of transport and have invested over £850 million in active travel between 2020/21 and 2022/23. Despite the need to deliver efficiency in all areas of our budget, we will still commit to spend at least a

further £100 million capital into active travel over the remainder of the spending period, as part of a total of around £3 billion investment in active travel over this Parliament, including from City and Region Sustainable Transport settlements and National Highways. We will review these levels as soon as practically possible.

These are the difficult but responsible decisions we are taking, that put the priorities of the British people first, in controlling inflation and reducing government debt. They continue our record investment into our national infrastructure, which will continue to play a vital role in growing our economy and delivering long-term prosperity.

Transport Secretary sets out record investment plans for transport network (https://www.gov.uk/government/news/transport-secretary-sets-out-record-investment-plans-for-transport-network), press notice.

Attachments: A5 Dualling NWBC Local Plan Statement.pdf; 0 Background.pdf; 1 Growth Corridor Study (Extract) - Schemes.pdf; 2 HIF Schemes.pdf

Hi Nick

As discussed, i've had a look at the models and can provide the following brief notes:

1. 2031 Reference Case. The Impact Assessment Results (VM200361.SP001) refers to including *A5 Ph1 & Ph2 improvements i.e. HIF scheme: Dordon to Grendon byass with the associated new roundabouts at each end, A5/Holly Lane improvements (widening & signals), and A5/Spon Ln/Boot Hill improvements (widening).* No specific improvements at Jn10 are indicated. The STA refers at Table row 8 to *Reconfiguration of M42 signal approaches and junction optimisation.* It is not clear whether the improvements to Jn10 have bene include in the Paramics model used to assess the development impacts - can you confirm.

   The 2031 Reference Case includes the A5 Phase 1 and 2 schemes, which were refined and assessed as part of the HE/WCC HIF bid in 2020. It is included in the 2031 Reference Case as it is considered committed (and funded through the HIF), but not included in the earlier years as it isn't likely to be completed then.
   The same scheme is included in the Local Plan scenario for the same reason (NB: schemes here were always identified as necessary in the STA and in the NWBC Plan to facilitate growth)
   I have attached an extract from the HIF reporting that summarises these schemes. Please note these may have evolved over time but this is what was included in the models that were subsequently used for this development assessment.
   M42 Junction 10 improvements are only in the Local Plan scenario. They were identified in the NWBC STA are 'aspirational'. Additional work was carried out in advance of the Plan hearing to determine if the combined growth from NWBC and NBBC could be accommodated and at this time a scheme at M42 J10 was confirmed as required. There has been quite a bit of work carried out over the years exploring schemes here. I am not up to speed with it all but a little bit of background is included in the Local Plan statement note that I have attached.

   The M42 J10 scheme, as included in the Local Plan model used to assess the Hodgetts Estates site, is shown below:

   I have highlighted where I have spotted significant differences from the Keir scheme, ost notably the signals on the Trinity Road approach (and the widening here) and the extra lane on the southern section of the circulatory (4 lanes).

2. Can you let me know what the reconfiguration/ reoptimisation works comprise in terms of physical widening/ lane reallocation of which approaches, and what signal timing alterations were included in this scheme assessed for the STA.

   See above

3. The 2031 Local Plan Case. The Impact Assessment Results refer to the improvements identified for the 2031 Reference Case above *plus M42 J10 enhancements, Grendon Bypass with associated new roundabout on eastern end, and the A5/B5000 Link Road*. The STA at Table 2 for Jn10 refers to *Widening of the A5 eastbound approach and circulatory to four lanes. Widening of the southern circulatory bridge to 4 lanes. Signal optimisation*. Can you confirm the nature of the improvement scheme which was included in the modelling, and whether it was the Kier scheme attached (file name - Appendix 6.1 & 6.2).

   See above and attached (see 1 Growth….)

4. The Impact Assessment results include journey time information for the A5 east of Jn10, but none for the A5 west of Jn10 or M42(S). Can queuing delays be provided for all junction approaches to M42 Jn10, A5/ Site Access and A5/ Birch Coppice?

   I'm afraid JT Paths were included in the model so we don't have this information. It could be collected but all models would need rerun to collect.

5. Can you confirm whether the signal junctions at M42 J10, A5 Site Access and A5/ Birch Coppice are set up within the model as fixed time with fixed offsets or whether they are VA/ MOVA controlled.

   Fixed times with fixed offsets. No MOVA in these models.

6. The Impact Assessment Results and the A5 Atherton Paramics Model do not include the junction at A5/ Core 42 (Hall End Farm), however this junction was included in the A5 Corridor Model. Can you advise why it was not included in the modelling work for Bancroft.

   This junction is in all the models as Hall End Farm is included as a committed development. Queue routes weren't added at this junction so queues at the access aren't presented but the delay (and the junctions itself) are in all models. See below (Ref and LP network)

I have attached extracts from various reports that should provide some background on the various models and the schemes. Also a WCC statement re. the A5 infrastructure that was presented at the examination.

Hopefully that helps.

Subject: RE: PARAMICS Modelling for potential new development on land to the northeast of M42 Junction

Hi Stuart

Thanks for the reply.

My queries are in relation to the work you carried out for Hodgetts Estates using the A5 Atherstone paramics model and seeks to identify what improvement schemes were included in the modelling work you did and the nature of those schemes. I am also asking whether further information can be obtained from the modelling work done for Hodgetts Estates. Can you clarify why Alan Lamb would need to respond to these?

Hi Nick

In the first instance, can you please direct any questions about the licenced models to WCC.

I suggest sending these queries to Alan Law alanlaw@warwickshire.gov.uk

Subject: PARAMICS Modelling for potential new development on land to the northeast of M42 Junction

Hi Stuart

I have been given your contact details by David Hodgetts. We have been asked to pick up the transport work on the application for the site Land NE of M42 Jn10. I have been provided with a copy of the LMVR for the Atherston A5 model, and the Paramics output spread sheets sent to Chris Bancroft (attached). I have also reviewed the STA 2017 produced for the North Warwickshire Local Plan and the A5 Corridor Study 2018 submitted to the EiP.

Following my review I have a some queries and would be grateful for your comments.

1. 2031 Reference Case. The Impact Assessment Results (VM200361.SP001) refers to including *A5 Ph1 & Ph2 improvements i.e. HIF scheme: Dordon to Grendon byass with the associated new roundabouts at each end, A5/Holly Lane improvements (widening & signals), and A5/Spon Ln/Boot Hill improvements (widening).* No specific improvements at Jn10 are indicated. The STA refers at Table row 8 to *Reconfiguration of M42 signal approaches and junction optimisation.* It is not clear whether the improvements to Jn10 have bene include in the Paramics model used to assess the development impacts - can you confirm.
2. Can you let me know what the reconfiguration/ reoptimisation works comprise in terms of physical widening/ lane reallocation of which approaches, and what signal timing alterations were included in this scheme assessed for the STA.
3. The 2031 Local Plan Case. The Impact Assessment Results refer to the improvements identified for the 2031 Reference Case above *plus M42 J10 enhancements, Grendon Bypass with associated new roundabout on eastern end, and the A5/B5000 Link Road*. The STA at Table 2 for Jn10 refers to *Widening of the A5 eastbound*

approach and circulatory to four lanes. Widening of the southern circulatory bridge to 4 lanes. Signal optimisation. Can you confirm the nature of the improvement scheme which was included in the modelling, and whether it was the Kier scheme attached (file name - Appendix 6.1 & 6.2).

4. The Impact Assessment results include journey time information for the A5 east of Jn10, but none for the A5 west of Jn10 or M42(S). Can queuing delays be provided for all junction approaches to M42 Jn10, A5/ Site Access and A5/ Birch Coppice?
5. Can you confirm whether the signal junctions at M42 J10, A5 Site Access and A5/ Birch Coppice are set up within the model as fixed time with fixed offsets or whether they are VA/ MOVA controlled.
6. The Impact Assessment Results and the A5 Atherton Paramics Model do not include the junction at A5/ Core 42 (Hall End Farm), however this junction was included in the A5 Corridor Model. Can you advise why it was not included in the modelling work for Bancroft.
7. It would be helpful to see the model operating at key AM and PM times - can this be arranged?

Happy to meet up over teams to discuss these points.

Look forward to hearing from you

Regards

Dr Nick Bunn **BSc(Hons) PhD MSc MCIHT CMILT**

OFFICIAL - Sensitive

Hi Gareth

The layout assumed in the Local Plan modelling working was informed by a study undertaken by PJA when WCC were considering petitioning HS2 to deliver the improvement when undertaken works in the area.

I have attached a copy of the pdf layout, I do not have a copy of the CAD. I could request this if really necessary. It should be noted that this is a concept plan, no feasibility assessment has been undertaken and no agreements with regards to acceptance of the proposal have been made with NH. There would also be a need to incorporate cycling facilities into the proposal.

Kind Regards

Alan

Hi Alan,

Hope you are well.

Just wondering if you have had chance to dig out a more detailed plan (CAD or PDF) of the Junction 10 improvement scheme associated with the Local Plan?

Kind Regards

Good Morning All,

Following the agreement on the attached TRANSYT modelling Note, I am wondering if you could provide me with the CAD drawing of the proposed Local Plan highway improvement works to M42 Junction 10 as shown on the attached “Image 1 – Junction 10 Improvement Scheme”? If a CAD is not available, a 1:500 PDF drawing will be fine so that I can extract the relevant geometries to code into the Local Plan TRANSYT model.

Kind Regards

Subject: M42 development site - Stagecoach 766/ 767 service

Hi Patrick,

I hope all is well.

In September 2022, Stagecoach supported a proposal to divert the 766/ 767 service into a proposed development north of the A5 Watling Street. Please see the letter of support and a site location plan attached.

There is an upcoming Public Inquiry for the scheme and I wanted to confirm that Stagecoach still support the service diversion?

Kind regards,

David

Subject: Re: M42 Junction 10 site - bus accessibility

Hi David

My apologies but I write further to previous correspondence on the plans for bus services to this development; due to a change in travel patterns on this corridor and significant increases in the costs of operation, the service is now being financially supported by Warwickshire County Council and will see significant changes to the route and timetable in July 2024. For this reason, the section 106 contribution required to serve this proposed future development will therefore need to significantly increase, likely to approximately £200k per annum, and going forward will need the input of Warwickshire County Council in determining the specification of the service.

My apologies for any inconvenience.

Best wishes

Patrick Stringer

Subject: M42 Junction 10 site - bus accessibility

Hi Patrick,

Further to my last email, I have spoken to my boss about the duration of contribution for the diversion of the 766/767 into the site. Can we suggest that *"A contribution of £30k per annum would commence at first occupation, and continue for either 5 years post occupation of the final phase of development, or for 10 years, whichever comes first."*

Can you confirm the above is acceptable?

Many thanks,

David

Subject: RE: Planning Application PAP/2021/0663 - Land west side of Dordon Road, Polesworth

OFFICIAL

Good evening Tony,

Thanks for the confirmation on the trigger and the update on the variance in contributions.

Warwickshire County Council

Request for consideration of S106 contributions.

- Highways (Statutory Consultee – to be submitted separately)
- Flood Risk and Drainage (Statutory Consultee – to be submitted separately)

Planning Application No	PAP/2021/0663
Planning Authority	North Warwickshire Borough Council
Case Officer	Andrew Collinson
Development Location	Land On The North East of J10 M42 Dordon/A5 , Polesworth
Number of dwellings	B2 & B8 (Industrial, storage and distribution use) on 32.36ha
Total contribution requested	£1,080,000

Contributions have only been requested which we believe to be CIL Regulation 122 compliant i.e.

- necessary to make the development acceptable
- directly related to the development
- fairly and reasonably related in scale and kind.

We request the following contributions. These are listed in WCC priority order. If you want to discuss these requests or seek clarification please contact the Infrastructure Team.

WCC Service Area	WCC Passenger Transport Team
Lead Officer Name and contact details	Dan Jeanes Tel – 01926 412242 E-mail – danjeanes@warwickshire.gov.uk
Details of the Request (to be used to inform the wording of the S106) • What is required • Why • Estimated cost and contribution requested • Link to WCC priorities	Section 106 Developer Contribution to Secure Bus Service Provision to serve the new Development: Contribution is requested to maintain (current in 2021) Service 766/7 linking the site with Tamworth, Atherstone and Nuneaton, at suitable shift change times. (Revised Pro-Forma submitted in May 2024 to take into account inflationary pressures since original submission)

Explanation of why required
The National Planning Policy Framework steers development towards promoting its connectivity with sustainable transport in order to facilitate sustainable development and also contribute towards wider sustainability.

The National Planning Policy Framework also promotes the integration of planning and sustainable transport in order to provide attractive alternatives to travelling by car to access employment, education, health facilities, leisure, amenities and health objectives - aimed at providing people with a real choice about how they travel.

Therefore, the County Council is seeking a contribution towards the cost of securing improvements to local bus service to support the forecasted demand in trips by sustainable means.

Contribution Sought:

Year 1 - £ 216,000
Year 2 - £ 216,000
Year 3 - £ 216,000
Year 4 - £ 216,000
Year 5 - £ 216,000
Total - £ 1,080,000

Justification of amount requested
The bus subsidy costs are consistent with the delivery of similar scope of service local bus service provision enhancements implemented at significant residential or commercial development sites.

Link to relevant WCC policies
The request for developer contributions to enhance local bus service connectivity with the major employment based new development is entirely consistent with the policies established in the Warwickshire Local Transport Plan 2011-26, in respect to promoting public transport connectivity between new development and employment sites, services and amenities.

Supporting information / evidence	NONE.
Pooling implications	NONE.

	**Coventry Canal, Tamworth** The image shows a cycleway/towpath running along the Canal. The view is looking west from a bridge near Tamworth Road / Florendine Street junction.

Appendix NRB 30: WCC & SCC Bus Meeting 22 May 2024

Meeting: M42 Jn10 Employment site bus accessibility meeting on Teams.
Date and Time: Wednesday 22nd May 2024 15.00pm – 16.00pm.
Attendees: Clive Jones (WCC), Nigel Whyte (WCC), Tony Burrows (WCC), John Mitcheson (SCC), David Hodgetts (Hodgetts Estates), Nick Bunn (TT), David Groves (TT)

Stagecoach 766/ 767

- DH explained that Stagecoach have recently informed the team that there are planned changes to the 766/ 767 route with the service effectively seeing the number of trips broadly reduced by half and truncated so that it no longer extends to Tamworth.
- CJ explained that the service would cease running in July 2024 due to the ending of Sc106 contributions from Birch Coppice and alternative provision was being provided – details below.
- DH explained that HE are keen for a bus service that connects the employment site with both Nuneaton and Tamworth.

New Service Provision

- CJ explained that the existing Stagecoach 41 bus service from Nuneaton and Atherstone is to extend to Birch Coppice to replace the 766/ 767 service. The service will run Monday to Friday which would begin operations on 21st July. There will be minor changes to the timetable frequency.
- JM explained that a tender will be issued this week for a new bus service (Route 66) between Tamworth and Birch Coppice to be funded via a government bus grant and would need to be in place by 21st July. SCC currently have funding for 2 years.
- NB asked if a route specification had been issued with the tender and JM/ CJ confirmed that a Route 66 timetable had been sent to tenderers and would send a copy to TT. **– Action JM.**
- JM/ CJ explained that together the 41 and 66 services would provide connections to Birch Coppice from both Nuneaton and Tamworth. When the M42 Jn10 employment site comes on stream and a bus service will extend into the site.
- JM/ CJ explained the new service would run in the early hours of the morning and then on lunchtime and afternoon shift patterns.
- DH explained that late night service provision maybe required but that this would not be known until end occupiers were confirmed. All agreed the timetable could be revisited at a later stage.
- JM/ CJ asked at what date first occupation of the M42 site will be. DH said that first occupation would be 1½ to 2 years.
- Prior to first occupation of the M42 site, the 41/66 services would extend to the development or alternatively the 766/767 would be reinstated and would include the site.
- CJ confirmed that the £216k per annum contribution sought would fully fund the 766/ 767 service including a diversion to the site.

Funding

- DH explained that Sc106 contributions of £216k per annum for 5 years were being sought as requested by WCC. The Sc106 Agreement has the bus contributions being paid to NWBC for distribution.
- SCC agreed to the five-year duration of developer contributions.
- TB will confirm with WCC legals if bilateral agreement between applicant and WCC for Sc106. **– Action TB.**
- JM explained that Mark Evans would confirm whether SCC would be party to the Sc106 Agreement. **– post meeting note, SoCG with SCC not party to Sc106.**

Public Transport Strategy Agreements and Actions

- WCC/ SCC agreed that a £216k per annum contribution is sufficient to secure a bus service between Nuneaton and Tamworth, which serves the site, on the same timetable as the current 766/767.
- SCC happy with five-year developer contributions.
- JM to send new route 66 timetable to TT. **– Action SCC.** – post meeting note, Tender documents sent to TT including timetable information.
- Mark Evans to confirm SCC would be party to Sc106 Agreement. **– post meeting note, SoCG with SCC not party to Sc106.**
